AVSIM is staffed completely by volunteers and all funds donated to AVSIM go directly back to supporting the community.. I am running X-Plane 11 25r2 on Windows 10 When I call up a SID or STAR chart, my aircraft does not show on the chart per the Navigraph instructions.. This donation keeps our doors open and providing you service 24 x 7 x 365 We reset this goal every new year for the following years goal.. if YES, you should see live LATLON Other than that I cant help on an iMac no issue tracking where available.

navigraph symlink not working

navigraph symlink not working

However it reports unable to reach Navigraph server, once I open simlink to see if everything is pointed where it needs to.. Just checking not every Navigraph SID and STAR are track available If NO, it will tell you with a note at the top of the chart in RED.. Your donation here helps to pay our bandwidth costs, emergency funding, and other general costs that crop up from time to time.. On Navigraph Charts when I try to connect it says could not connect to simulator.
